CATHODE LIGHTING APPLICATIONS
Project Number: 11407

PROJECT 11407* MORONGO

The Pit Bar is the focal point of the casino gaming floor. The bar is surrounded by a beaded water curtain that is emanating from a serrated ceiling. The ceiling design is highlighted using blue cold cathode lamps. There is no down-lighting over the seating area of the bar except at the water curtain therefore the cold cathode system not only enhances the architectural elements but casts a sexy blue glow upon it's patrons.

The Crescent Walk guides you through the casino gaming floor. Overhead are large custom pendants providing a warm glow as well as down-lighting. In contrast to the warmth of the pendants are the coves with blue, shadow-free cold cathode lamps which mirror the curve of the walkway below.

Up-light on the intricate adjacent ceiling element and also at the signage shelves used a 3000°K Warm White cold cathode to silhouette the architecture.

PROJECT CREDITS :

- project: morongo casino resort & spa
- location: cabazon california
- architect: the jerde partnership
- lighting design: visual terrain
- photography: tom paiva

* **cold cathode lighting system:**
T-100 standard lumen transformer system
[refer to cold cathode technical sheets sections 1.00 and 2.00]
