

A Fusion of the Art and Science of Light

SPECIFICATIONS :

model: ET ST, Electric Tree Strut
primary power: 120V, 16 AMPS
compliance: UL Listed
control: Color changing / dimming compatible
finish: See specification code below
dimensions: 13'6" height, 1'10" diameter, also 9', 4 strut available
lamp color(s): see color chart on Details sheet
date: October 4, 2008

FEATURES :

ET (Electric Tree) Strut is a hybrid of a luminaire and light sculpture. This concept is a metamorphosis of the Electric Tree series, which were large-scale site-specific light sculptures. ET Strut consists of three key structural assemblies; the base structure and cover, the power trunk and the head. The base structure and cover is designed to house electrical components. The power trunk is a vertical fluted aluminum section that can extend as much as 20 feet high. The flutes are designed to accept the attachments of unlimited designs.
